Version 1.0 | August 2026

1. Overview

Yachiyo is a public Discord application designed to help server owners and staff create organized, welcoming, and well-moderated communities. Its settings are stored persistently so configured features remain available after a restart.

Yachiyo is focused on server management, moderation, community panels, profiles, tickets, reminders, and interactive tools. Economy and fishing features are provided by Kaguya-App.

2. Installation and permissions

To add Yachiyo, open her Discord profile, choose **Add App**, select **Add to Server**, choose a server where you have Manage Server permission, and authorize the requested permissions. Yachiyo must be installed with the **bot** and **applications.commands** scopes.

Recommended permissions include View Channels, Send Messages, Embed Links, Attach Files, Read Message History, Manage Messages, Manage Roles, Manage Channels, Add Reactions, Moderate Members, Connect, and Speak. Grant only the permissions needed by your server.

3. General use

Most features are slash commands. Type `/` in a channel and select the command from Discord's command menu. Commands marked Admin require Administrator permission; staff commands use the relevant Discord permission. Setup commands normally save the configuration and publish or refresh a panel in the selected channel.

4. Public support and custom bot requests

Use `/report-bug` to open Yachiyo's official bug-report form. Anyone may use it to report a bug, error, or unexpected behavior. If you would like a custom Discord bot, use `/want-your-own-bot` to open a Telegram contact button for Yachiyo's creator.

Custom bot requests may require a small fee depending on the workload, requested features, complexity, and time needed. Requirements and pricing are discussed clearly before any work begins.

Please include the command used, the expected result, the actual result, the server and channel context when relevant, and screenshots that do not expose passwords or private tokens.

5. Moderation and safety

These commands help staff respond to rule violations and keep the server safe. After a warning, timeout, kick, or ban, Yachiyo sends the affected member a private notification containing the action, server, reason, and moderator when Discord allows direct messages.

Command	Use	Access
<code>/warn user reason</code>	Create a moderation warning.	Staff
<code>/warnings user</code>	View a member's recent cases.	Staff
<code>/kick user reason</code>	Remove a member from the server.	Staff
<code>/ban user reason</code>	Ban a member.	Staff
<code>/unban user_id reason</code>	Remove a ban by user ID.	Staff
<code>/timeout user minutes reason</code>	Temporarily restrict a member.	Staff
<code>/untimeout user</code>	Remove a timeout.	Staff
<code>/purge amount</code>	Delete recent messages in the current channel.	Staff
<code>/lock</code>	Lock the current channel.	Staff
<code>/unlock</code>	Unlock the current channel.	Staff

6. Curse-word and spam protection

Yachiyo supports whole-word curse matching and server-wide rapid-message protection.

Command	Use	Access
<code>/curse-setup words</code>	Save the server's filtered words.	Admin
<code>/curse action</code>	Activate, deactivate, or view the filter.	Admin
<code>/curse-list</code>	View saved filtered words.	Admin
<code>/curse-exempt-role action role</code>	Add, remove, or list exempt roles.	Admin
<code>/spam-setup action</code>	Activate, deactivate, view, or reset spam protection.	Admin
<code>/logs channel</code>	Set the main audit-log channel.	Admin
<code>/logs-category category channel</code>	Send a log category to a separate channel.	Admin

7. Introductions and tickets

These tools create structured member support and welcome systems.

Command	Use	Access
/introduction-setup channel reward_role	Configure the introduction channel and optional reward role.	Admin
/introduction-panel action	Refresh or edit the introduction panel.	Admin
/introduction-template action	View or edit the template.	Member/Admin
/introduction-reset user	Reset a member's introduction limit.	Admin
/introduction-status	View introduction settings and status.	Admin
/introduction-reward-role role	Set or clear the reward role.	Admin
/introduction-reward-cleanup	Clear legacy introduction records and rewards.	Admin
/ticket-setup channel ticket_category	Configure the ticket panel and ticket category.	Admin
/ticket-role action role	Manage staff roles with ticket access.	Admin

8. Server panels and community tools

Create, edit, and refresh the server's visual information systems.

Command	Use	Access
/rules-setup channel banner	Create the editable Rule Book panel.	Admin
/rules-panel	Refresh the Rule Book panel.	Admin
/rules-edit section	Edit one Rule Book section.	Admin
/rules-banner banner	Replace the Rule Book banner.	Admin
/server-info-setup channel	Create the Server Info panel.	Admin
/server-info-edit	Edit Server Info content.	Admin
/server-info-banner banner	Replace the Server Info banner.	Admin
/server-info-staff role	Add staff roles in display order.	Admin
/server-info-recount	Recount readable message history.	Admin

Command	Use	Access
/reaction-role panel or setup	Create and manage reaction-role panels.	Admin
/emoji-upload	Turn image attachments into server emojis.	Moderator

9. Profiles and member tools

Members can save and view public game profiles through Yachiyo's profile panels.

Command	Use	Access
/roblox-user username	Save a Roblox username.	Member
/roblox-checkuser user	View a member's Roblox profile.	Member
/roblox-panel-setup channel	Configure the Roblox profile panel.	Admin
/roblox-panel	Refresh the Roblox panel.	Admin
/mlbb uid	Save an MLBB UID.	Member
/mlbb-checkuser user	View a member's MLBB profile.	Member
/mlbb-panel-setup channel	Configure the MLBB panel.	Admin
/mlbb-panel	Refresh the MLBB panel.	Admin
/hsr uid	Save an HSR UID.	Member
/hsr-checkuser user	View a member's HSR profile.	Member
/hsr-panel-setup channel	Configure the HSR panel.	Admin
/hsr-panel	Refresh the HSR panel.	Admin
/genshin uid	Save a Genshin UID.	Member
/genshin-checkuser user	View a member's Genshin profile.	Member
/genshin-panel-setup channel	Configure the Genshin panel.	Admin
/genshin-panel	Refresh the Genshin panel.	Admin

10. Events, games, and voice

Interactive tools for community participation.

Command	Use	Access
/giveaway start	Create a restricted giveaway with duration and winners.	Staff
/giveaway repick giveaway_id	Randomly choose replacement winners.	Staff
/tod-setup channel	Configure the Truth or Dare channel.	Admin
/tod-panel	Refresh the Truth or Dare panel.	Admin
/temp-vc-setup channel category	Configure Join to Create temporary VCs.	Admin
/temp-vc-panel	View temporary VC settings.	Admin
/my-vc	Edit your temporary VC name or status.	Member
/vc-join channel	Make Yachiyo join and remain in a VC.	Admin

11. Offline helper brain

Yachiyo can answer simple questions when mentioned, including basic server facts, time questions, simple maths, channel-finding requests, English and Filipino/Taglish questions, and friendly replies.

Command	Use	Access
/brain-faq add list remove	Manage saved server FAQ answers.	Admin
/role-guide add list remove	Manage role instructions.	Admin
/ping	Check whether Yachiyo is online.	Member
/help	Open the interactive command center.	Member
/server-status	View live server information.	Member
/member-info user	View member details and activity.	Member

12. Privacy and responsible use

Yachiyo uses Discord's API and stores limited configuration and feature data required to operate the bot. Server owners control which features are enabled. Do not place passwords, tokens, payment data, or other sensitive information in command responses or bug reports.
